

BARBADIAN DREAMS

Footprints is Kelly Hoppen MBE's latest project and is situated on the exotic island of Barbados. Drawing inspiration from the tropical climate and idyllic views of its location, the result is a 7,000 square feet beach house with a light and inviting atmosphere. The interior was designed with entertainment and comfort as guiding values. Big and open living spaces were a prerequisite for this property in which people can smoothly filter from an open terrace, through a covered dining room and into an indoor sitting room. With Footprints, Kelly managed to create an interior that is universal in style, yet embracing the local environment. Her signature palette of neutral colours is present in every room of the property and the use of materials such as planking on walls, ceramic, linens and stripes ensure the house is in keeping with the Barbadian surroundings.

Footprints, Barbados was designed by Kelly Hoppen and completed in September 2013. Photography by Mike Toy.
