Why Buy a Hunter Ceiling Fan?

Installed Costs, £

Running Costs £/year

FOR COMFORT AND TO SAVE ENERGY, MONEY AND CO2

A Hunter fan is about 10% of the installed cost of an equivalent air conditioning system. Its annual running costs are less than 5%.

If you have existing air conditioning it will cut your energy costs by up to 40%. If you add the heat savings in winter achieved by running the fan in reverse to recirculate trapped hot air it will also reduce heating costs by up to 24%. They will pay for themselves.

COMFORT

A Hunter fan will keep your house cool as it gives a wind chill factor of up to 5 degrees C. The ceiling fan effectively moves the air around the room, providing a fresh and cool experience. They are the 'ultimate home accessory' ideal for operation in the lounge, kitchen, bedroom, dining room or conservatory. Their stylish appearance improves the ambience of every room. No dry air and dry skin associated with sicknesses, just a steady gentle breeze.

QUIETNESS

No annoying hums or vibrations. Hunter blades and blade irons are weighed and matched in sets, so the fan won't wobble. They also have a patented wobble free canopy that prevents any vibration. Since 1886 Hunter has been the leader in ceiling fan motor technology. Every Hunter motor is rigorously tested to assure it is whisper quiet. The

patented AirMax and Whisper Wind motors will perform quietly for years and years.

EFFICIENCY

More powerful motors let Hunter use larger blades, to catch and move more air. The blades are set at the optimum pitch, for maximum air flow. Independent tests prove more air is moved per watt of power than any other make.

ENVIRONMENTALLY FRIENDLY

It has a very low CO2 footprint as it only uses 5% of the energy required for an equivalent air con unit. The fans use about the same electricity as a 100 watt light bulb compared to the 2000 - 3000 watts required for an equivalent air conditioning unit. If you add in the winter heat savings these fans will actually reduce your CO2 output.

LIFETIME WARRANTY

Hunter invented the ceiling fan and is the largest fan manufacturer in the World. They have a worldwide reputation as a premium brand and are known for their durability, innovation and style. They have larger motors, last longer, are silent and backed by a lifetime warranty. No servicing is required. Just years of trouble free service – how all appliances should be. Inside out Hunter fans are built to last. Hunter finishes are tarnish, scratch, and rust resistant. Some are waterproof.

PERFECT FOR CONSERVATORIES

Why suffer from a hot, stuffy and uncomfortable conservatory? A ceiling fan is the perfect economic solution to bring you the comfort and relaxation you dreamed of. With fresh air gently circulating to keep you cool in the summer and warm in the winter your conservatory will never be the same again. Invest a little bit more to help you enjoy it to the full.

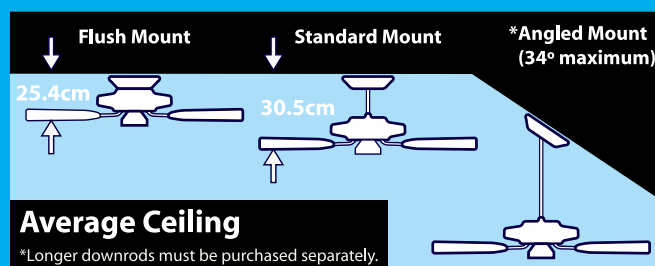

The Hunter Range

WIDE CHOICE OF MODELS

With 29 stylish models, in 24 motor finishes, with 54 blade selections, nobody provides a wider choice. There is something to match every taste. Here we show just a few samples from the range.

DIFFERENT CEILING HEIGHTS

Low or high ceilings? If your ceiling is 2.75m or higher, purchase a fan extension downrod. Choose a finish that matches the fan motor. For low ceiling look at our new Modern Low profile that hugs the ceiling with no drop rod. You can also use any fan that can be flush mounted.

Low Ceiling

Low Profile® Specially designed for low ceiling applications. The motor housing fits flush to the ceiling.

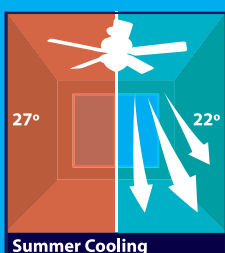

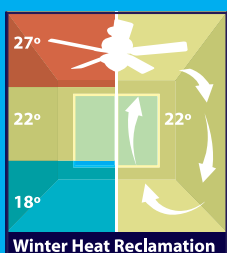

REVERSIBLE BLADES

For styling flexibility, each set of blades has a different finish on each side.

LIGHTING & ACCESSORIES

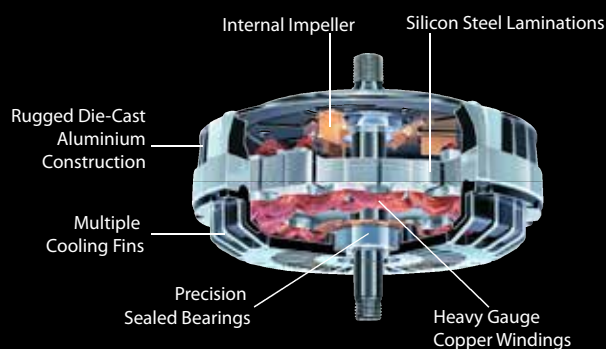

Choose a fan with a coordinated light fixture included or customise the fan with your choice of light fixture. We have a full range of other fan accessories so you can achieve exactly the look you want.

ADVANCED TECHNOLOGY AND INNOVATION

The AirMax Motor

Hunter fans are powered by our patented AirMax Motor® - the quietest, most powerful, most durable motor we've ever created. Quietly cooling your home for a lifetime.

WobbleFree Canopy

For a lifetime of wobble-free operation, Hunter introduces WobbleFree. Our patented triglobular shaped hanger ball dissipates the wobble that some fans experience.
