

MATTHEWS

FAN COMPANY

**PRODUCT CATALOG
SPRING 2020**

Matthews Fan Company has been at the forefront of bringing unique ceiling, wall and portable fan products to both the residential and commercial markets since 1992.

Our innovative fans combine traditional, contemporary and industrial designs, retrospective elements and always high performance.

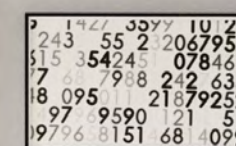

Matthews proudly integrates American parts and labor into the production of all of our products.

Visit one of our retailer partners or contact us for more information regarding our quality products and customization.

GREEN

MATTERS

Matthews' fans achieve some of the highest efficiency ratings in the industry through:

- DC Motor technology allows for large, powerful blades which provide more robust airflow and ultra-quiet operation.
- Rotational fans reduce HVAC costs by mixing ambient air more thoroughly.
- Directional and Wall fans provide columnar airflow which can be customized.

Matthews does not field destroy

- 95% of damaged and defective materials are recycled or re-purposed.

Matthews achieves low defect rates because:

- All fans are visually inspected before shipping.
- All rotational and oscillating fans are bench tested before shipping.

Acqua

Designed in 2008

shown in Textured Bronze
with Mahogany Blades

The Acqua 360° rotational fan is thoughtfully designed to resemble the molecular structure of water, Earth's most precious resource. The Acqua offers fluid lines and quiet axial rotation. Its fan heads can be infinitely positioned in 180-degree arcs for optimum air movement; the greater the angles of the motors to the horizontal support rods (up or down), the faster the axial rotation. A slow, controlled axial rotation is achieved by both fan head position and fan blade speed. Matthews rotational fans circulate heat and air-conditioning more efficiently than traditional paddle fans. Constructed of cast aluminum and heavy stamped steel, the Acqua carries a limited lifetime warranty.

America

The America fan is a practical solution for both residential or commercial spaces with a more traditional aesthetic. It is available with either 42 or 52 inch diameters, along with an optional light kit. The blades are reversible as either white or light oak tone finish. The America carries a limited lifetime warranty.

Product Features

USA

Applicability to Buy American Act:
Domestic Construction Materials Clause (Feb 2009): 52-225-9 (4)(2)(i). The cost of its components mined, produced, or manufactured in the United States exceeds 50 percent of the cost of all its components.

Breakdown of Origin of Materials:
Ceiling fan parts are made in Taiwan, a World Trade Organization Government Procurement Agreement country. Final assembly and UL 507 electrical compliance testing will be done in the US. US labor will be used in the assembly, handling and testing of this fan.

ITEM	ORIGIN	% of COST of ITEM

Dagny

Designed in 2011

The double-headed 360° rotational fan, Dagny, with cylindrical central housing and straight, parallel arms, is designed in the retrospective aesthetic. The Dagny offers smooth and quiet axial rotation. Its fan heads can be infinitely positioned in 180-degree arcs for optimum air movement; the greater the angles of the motors to the horizontal support rods (up or down), the faster the axial rotation. A slow, controlled axial rotation is achieved by both fan head position and fan blade speed. Matthews rotational fans circulate heat and air-conditioning more efficiently than traditional paddle fans. Constructed of cast aluminum and heavy stamped steel, the Dagny carries a limited lifetime warranty. The Dagny is also available with a light kit as the **Dagny-LK**.

Dagny LK

Designed in 2013

With clean, fluid lines, the Dagny LK 360° rotational fan is a striking centerpiece in any space. Its movement about its cylindrical center housing is smooth and quiet. Dagny LK's dual fan heads can be infinitely positioned in 180-degree arcs for optimum and customized air movement. As the angle between the fan heads and the horizontal support rods is increased, so does the speed of Dagny LK's axial rotation. Matthews rotational fans circulate heat and air conditioning more efficiently than traditional paddle fans. Constructed from cast aluminum and heavy stamped steel, the Dagny LK carries a limited lifetime warranty. This model is also available without a light kit as the **Dagny**.

Eliza

Geometry in Motion
Designed in 2014

Designed by Chicago architect Stephen Katz in 2013, the wet location Eliza blends a beautiful technically derived form with superior function and movement. The unique blade shape is designed to maximize air movement at the outer edge of the blade. The result is more efficient air velocity rings, less blade drag and greater motor optimization. Equally important is Eliza's stationary visual statement which combines modern utility with minimalist geometry. Constructed of cast aluminum and heavy stamped steel, the Eliza has a limited lifetime warranty.

Irene-3

Designed in 2012

The Irene-3 is rustic, yet strikingly modern with three neatly joined, solid matte black, matte white, walnut, or barn wood tone blades. A spherical motor housing complements its minimal profile. Irene-3 is streamline while still appearing warm and natural. Constructed of cast aluminum and heavy stamped steel, the Irene-3 has a limited lifetime warranty.

Kaye

Designed in 2012

The beautiful Kaye 3-speed versatile-mount, wall or ceiling fan, oscillates left to right, forward and reverse, in a 90° sweep. Its design is reminiscent of vintage train cabin ventilators of yester-year, and will cool down your favorite space with poise and determination. Kaye's profile is low, however its strength and character define it. Kaye can be mounted in any small or awkward spaces or in front of HVAC ducts to improve the efficiency of the heating, ventilation or air conditioning of your favorite space. Constructed of cast aluminum and heavy stamped steel, the Kaye carries a limited lifetime warranty.

Lindsay

Designed in 2019

The Lindsay ceiling fan offers a simple, yet refined air flow solution to any space. The two elegant, solid wood blades quietly circulate air as they revolve around an understated central motor housing. Integrated into the design is an eco-friendly, dimmable LED light kit which will provide illumination for decades to come. The Lindsay is available in matte black, matte white and textured bronze finishes. Blade finish options are barn wood, matte black, matte white or walnut. Constructed of cast aluminum and heavy stamped steel, Lindsay carries a limited lifetime warranty.

Molly

Designed in 2018

Designed by Chicago architect Stephen Katz in 2018, the Molly ceiling fan combines modern organic geometry with outstanding performance and function. The blade shape was developed using advanced computer software which allowed the design to achieve a complex form. The result is a clean, natural and contemporary look perfect for any room or décor. Available in gloss white or matte black finish, Molly will complement a variety of design styles while also providing a fresh and unique, modern statement. Constructed of cast aluminum and heavy stamped steel, the Molly carries a limited lifetime warranty.

Designed by Chicago architect Stephen Katz in 2018, the Mollywood ceiling fan combines modern organic geometry with outstanding performance and function. The blade shape was developed using advanced computer software which allowed the design to achieve a complex form. The result is a clean, natural and contemporary look perfect for any room or décor. Available in matte black, matte white, or textured bronze finishes with either barn wood, matte black, matte white or walnut tone solid wood blade options. Mollywood will complement a variety of design styles while also providing a fresh and unique, modern statement. Constructed of cast aluminum and heavy stamped steel, Mollywood carries a limited lifetime warranty.

Patrícia-3

Designed in 2015

A complement to any commercial or residential space, the Patrícia-3 seamlessly combines innovation with simple, refined design. Its elegant aesthetic belies its robust construction. Solid wood walnut, matte black, matte white, or barn wood tone blades revolve around a balanced, cylindrical DC motor housing. Air is circulated efficiently with barely more than a whisper. An eco-conscious LED light kit completes the package, making Patrícia-3 sophisticated, efficient and green. Constructed of cast aluminum and heavy stamped steel, the Patrícia-3 carries a limited lifetime warranty.

Ar Ruthiane

Designed in 2004

The Ar Ruthiane's unique hourglass support arms grasp bullet-shaped motor housings which rotate 360° about its teardrop center. The fan heads can be infinitely positioned in 180-degree arcs for optimum air movement; the greater the angles of the motors to the horizontal support rods (up or down), the faster the axial rotation. A slow, controlled axial rotation is achieved by both fan head position and fan blade speed. Matthews 360° rotational fans circulate heat and air conditioning more efficiently than traditional paddle fans. Constructed of cast aluminum, heavy spun and stamped steel, the Ar Ruthiane carries a limited lifetime warranty.

Brisa 2000

Designed in 2000

Like satellites orbiting a planet, the Brisa's select mahogany blade head and lunar counterweight gently revolve 360° about its spherical gear housing. The fan head can be infinitely positioned in a 180-degree arc for optimum air movement; the greater the angle of the motor to the horizontal support rods (up or down), the faster the axial rotation. A slow, controlled axial rotation is achieved by both fan head position and fan blade speed. Matthews 360° rotational fans circulate heat and air conditioning more efficiently than traditional paddle fans. Constructed of cast aluminum, heavy spun and stamped steel, the Brisa carries a limited lifetime warranty.

Bruna Parede

Designed in 2007

The Bruna Parede is reminiscent of the wall fans of the early 20th century. The fan head of the Bruna Parede wall mounted fan can be infinitely positioned vertically and horizontally across 180-degree arcs to provide maximum directional airflow. It can be mounted in small, awkward spaces or in front of HVAC ducts to make more efficient the heating, ventilation or air conditioning of any space. Constructed of cast aluminum, heavy spun and stamped steel, the Bruna Parede carries a limited lifetime warranty.

Duplo-Dinamico

Designed in 1963

Few designs can match the timeless and sophisticated aesthetic of the Duplo-Dinamico 360° rotational fan. Other manufacturers have tried to reproduce this unique design, though all have proven to be of lesser quality and durability. The fan heads can be infinitely positioned in 180-degree arcs for optimum air movement; the greater the angles of the motors to the horizontal support rods (up or down), the faster the axial rotation. A slow, controlled axial rotation is achieved by both fan head position and fan blade speed. Matthews 360° rotational fans circulate heat and air conditioning more efficiently than traditional paddle fans. Constructed of cast aluminum, heavy spun and stamped steel, the Duplo carries a limited lifetime warranty.

Italo Ventania

Designed in 2007

The Italo Ventania is the largest 360° rotational fan in the Matthews Fan Co collection. Its vortex sculpted arms grasp also remarkable, side-mounted fan heads in gentle, equatorial rotation. The fan heads can be infinitely positioned in 180-degree arcs for optimum air movement; the greater the angle of the motor to the horizontal support rods (up or down), the faster the axial rotation. A slow, controlled axial rotation is achieved by both fan head position and fan blade speed. Matthews 360° rotational fans circulate heat and air conditioning more efficiently than traditional paddle fans. Constructed of cast aluminum, heavy spun and stamped steel, the Ar Ruthiane carries a limited lifetime warranty.

Jarold Direcional

Designed in 2007

Unique and versatile, the fan head of the Jarold Direcional ceiling fan can be infinitely positioned in a 180-degree arc, forward and reverse, to provide maximum, directional airflow. The Jarold can be hung in small, awkward spaces or in front of HVAC ducts to make more efficient the heating, ventilation or air conditioning of any room. Constructed of cast aluminum, heavy spun and stamped steel, the Jarold Direcional carries a limited lifetime warranty.

Michelle Parede

Designed in 2002

The Michelle Parede is reminiscent of wall fans of the early 20th century. The fan head of the Michelle Parede wall mounted fan can be infinitely positioned vertically and horizontally across 180-degree arcs to provide maximum directional airflow. It can be mounted in small, awkward spaces or in front of HVAC ducts to make more efficient the heating, ventilation or air conditioning of any space. Constructed of cast aluminum, heavy spun and stamped steel, the Michelle Parede carries a limited lifetime warranty.

Vent-Bettina

Designed in 2002

The Vent-Bettina 360° rotational fan is thoughtfully designed with its arms gently upward curving. The fan offers fluid lines and quiet axial rotation with motor heads which can be infinitely positioned in 180-degree arcs for optimum air movement; the greater the angles of the motors to the horizontal support rods (up or down), the faster the axial rotation. A slow, controlled axial rotation is achieved by both fan head position and fan blade speed. Matthews 360° rotational fans circulate heat and air conditioning more efficiently than traditional paddle fans. Constructed of cast aluminum, heavy spun and stamped steel, the Vent-Bettina carries a limited lifetime warranty.
